EDUCATION

- 2024 **University of British Columbia (UBC)**
PhD in Quantitative Health Outcomes Research
Thesis: [Projecting the outcomes of early interventions for asthma: data-driven and modeling studies](#)
Supervisors: [Mohsen Sadatsafavi](#), [John Petkau](#)
- 2019 **University of British Columbia**
MSc in Statistics
Thesis: [Robust methods for generalized partial linear and partial additive models with an application to detection of disease outbreaks](#)
Supervisors: [Matias Salibian-Barrera](#), [James V. Zidek](#), FRSC, Order of Canada
- 2016 **University of British Columbia**
BSc (Hons.) in Statistics with Minor in Chemistry

RESEARCH EXPERIENCE

- 2024-Present **Banting Postdoctoral Fellow**, Stanford University School of Medicine, U.S.A.
Quantitative Sciences Unit, Division of Computational Medicine
Supervisor: [Summer S Han](#)
- Extension of a lung cancer microsimulation model to account for second primary tumors.
 - Neighborhood-level socioeconomic status and area-level exposure data curation and analysis.
 - Clinical utility and fairness in clinical prediction models.
 - Development of decision curve analysis and value-of-information analysis methodologies for survival risk prediction models.
 - Rigor and reproducibility in decision-analytic modeling studies and real-world data studies.
- 2019-2024 **PhD Researcher**, University of British Columbia (UBC), Canada
Respiratory Evaluation Sciences Program, Faculty of Pharmaceutical Sciences
Supervisors: [Mohsen Sadatsafavi](#), [John Petkau](#)
- Development of a microsimulation model for evaluating asthma interventions in Canada.
 - Economic evaluation of infant antibiotic exposure on asthma outcomes.
 - Long-term national hospitalization trends in asthma and chronic obstructive pulmonary disease.
 - Development of value-of-information analysis methods for clinical risk prediction models.
 - Cascading effects of severe asthma exacerbations on subsequent events.

- 2023 Spring **Visiting Research Fellow (4 months)**, National University of Singapore (NUS), Singapore
Saw Swee Hock School of Public Health
Supervisor: [Wenjia Chen](#)
- International variation in severe exacerbation rates in patients with severe asthma.
 - Development and validation of a risk prediction model for severe asthma exacerbations using two international disease registries.
 - Design and implementation of a web-based risk calculator in collaboration with clinicians.
- 2016-2019 **MSc Researcher**, UBC, Canada
Department of Statistics
Supervisors: [Matias Salibian-Barrera](#), [James V. Zidek](#), [FRSC](#), [Order of Canada](#)
- Rigorous analysis of an existing disease outbreak algorithm at British Columbia Centre for Disease Control.
 - Development of a robust semi-parametric linear regression method, with applications to disease outbreak detection.
 - Elucidating the role of dimensions, scales, and units of measurement in statistical modeling.
- 2019 Summer **Data Science for Social Good Fellow**, UBC, Canada
UBC Data Science Institute
Supervisor: [Raymond Ng](#)
- Application of natural language processing to enhance automatic annotation of semi-structured laboratory test results.
 - Proof-of-concept case study illustrating the impact of active learning on efficiently creating a labeled dataset for machine-learning applications.
- 2018 Fall **Big Data Analytics and Research Intern (4 months)**, United Nations, Thailand
United Nations Capital Development Fund
Supervisor: [Robin Gravesteijn](#)
- Design of a quasi-experiment for evaluation of a financial training program in factory garment workers in low-income countries.
 - Development of questionnaires for the evaluation of the financial training program.
- 2017-2019 **Research Assistant**, UBC, Canada
Sauder School of Business
Supervisors: [Garland Chow](#), [Ralph Winter](#)
- Spatio-temporal economic analysis of taxi trip data.
 - Economic analysis of no-surcharge rules in credit card services.

AWARDS AND HONORS

- 2026 Finalist in the Lee B. Lusted Student Prize Competition in Applied Health Economics, Annual Meeting of the Society for Medical Decision Making
- 2025 Lee B. Lusted Award for the Best Presentation in Quantitative Methods and Theoretical Developments, Annual Meeting of the Society for Medical Decision Making
- 2022 2021-2022 Outstanding Service Awards for Graduate Students
- Finalist in the Lee B. Lusted Student Prize Competition in Quantitative Methods and Theoretical Developments, Annual Meeting of the Society for Medical Decision Making

2021	Li Tze Fong Memorial Fellowship (\$25,000)
2019-2023	UBC 4-Year Fellowship (\$72,800)
2019	B.C. Graduate Scholarship (\$15,000)
	Mitacs Accelerate Fellowship at UBC Data Science Institute (\$3,000)
2017	Travel Award to the Eighth Montreal Industrial Problem Solving Workshop (\$850)
	Travel Award to the 2017 Mathematical Modeling in Industry Workshop (\$500)
	Travel Award to the Fourth Annual Graduate Workshop on Environmental Data Analytics (\$1,500)

GRANTS AND FELLOWSHIPS (PEER-REVIEWED / COMPETITIVE)

2024-2025	Banting Postdoctoral Fellowship (\$140,000) Project: Development and evaluation of second primary lung cancer screening in lung cancer survivors. Supervisor: Summer S Han, Stanford University.
2023-2024	IVADO Postdoctoral Fellowship (\$150,000; declined) Project: Development and validation of a West Nile virus policy platform for Canada. McGill University.
2023	Mitacs Globalink Research Award (\$6,000) Project: Development and validation of a risk prediction model for severe exacerbations in patients with severe asthma. Supervisors: Wenjia Chen, NUS; Mohsen Sadatsafavi, UBC.
2021	Canadian Respiratory Research Network Studentship Award (\$21,000) Project: Projecting the outcomes of early interventions of asthma: data-driven and modeling studies. Supervisors: Mohsen Sadatsafavi, John Petkau, UBC.

PRESENTATIONS AND CONFERENCE PROCEEDINGS

*Presented by Mentee

- 2026 [Oral] Long-term PM2.5 exposure and lung cancer-specific mortality in patients who have never smoked across two healthcare systems. 2026 Sep. 2026 World Conference on Lung Cancer. Seoul.
- [Oral] Group fairness in clinical prediction models: A case study in cancer screening policy. 2026 Aug. 2026 Joint Statistical Meetings. Boston.
- [Oral] Robust decision curve analysis for survival prediction models in the presence of informative censoring. 2026 June. SMDM 48th Annual Meeting. University of Oslo. Oslo.*
- [Poster] Evaluating composite eligibility criteria in lung cancer screening: The Multiethnic Cohort Study. 2026 June. SMDM 48th Annual Meeting. University of Oslo. Oslo.
- [Invited Oral] From screening to survivorship: Clinical utility of composite lung cancer screening criteria and post-diagnosis PM2.5 exposure. 2026 June. Respiriology Grand Rounds. The Centre for Lung Health. Vancouver.
- [Invited Oral] From second primary lung cancer to survivorship: Time-varying ambient air pollution exposure and long-term cancer outcomes. 2026 Mar. International Lung Cancer Consortium Annual Meeting. Honolulu.
- [Invited Oral] Value of information analysis for clinical prediction models. 2026 Feb. [Collaborative Network on Value of Information](#). Online.
- 2025 [Oral] Disparities in lung cancer screening. 2025 Nov. The 3rd Berkeley x Stanford Academic Symposium. San Jose.
- [Poster] Socioeconomic inequalities and lung cancer outcomes: Evidence from an integrated EHR database and state cancer registry Data. 2025 Sep. 2025 World Conference on Lung Cancer. Barcelona.

- [Poster] Harnessing large language models to extract smoking history from clinical notes in EHR to evaluate lung cancer surveillance strategies. 2025 Sep. 2025 World Conference on Lung Cancer. Barcelona.
- [Oral] Estimating the impact of ambient air pollution on overall mortality in the presence of preferential sampling and measurement error using electronic health record data. 2025 Aug. 2025 Joint Statistical Meetings. Nashville.
- [Poster] Value of information analysis for development of survival risk prediction models. 2025 June. SMDM 47th Annual Meeting. University of Michigan.
- [Oral] Upgrading grading: Exploring alternative approaches to assessment. 2025 June. Stanford Postdoc Pedagogy Journal Club. Stanford University.
- [Poster] Socioeconomic inequalities and lung cancer outcomes: evidence from an integrated EHR database and state cancer registry data. 2025 May. 8th Stats4Oncology Annual Symposium. Stanford University.
- [Poster] Value of information analysis for external validation of survival risk prediction models. 2025 May. 8th Stats4Oncology Annual Symposium. Stanford University.
- [Oral] Junior investigator round table session. 2025 Mar. Stanford Lung Cancer Summit: Understanding Lung Cancer in People Who Have Never Smoked. Stanford University.
- [Oral] Fairness in healthcare: Application in lung cancer screening. 2025 Feb. University of Pennsylvania Department of Epidemiology and Informatics.
- 2024 [Oral] Development and validation of an asthma policy model for Canada. 2024 Jan. Let's be Precise: The Future of Child Health. Toronto.
- 2023 [Oral] Development and validation of an asthma policy model for Canada. 2023 Nov. Research Oversight Committee Meeting for the [CHILD study](#). Genome BC.
- [Poster] Development and validation of an asthma policy model for Canada. 2023 Oct. 45th Annual Meeting of the Society for Medical Decision Making.
- [Oral] Retrospective impact analysis of infant antibiotic exposure on the burden of asthma. 2023 Oct. Canadian Respiratory Research Network Meeting. Ottawa.
- [Oral] Retrospective impact analysis of infant antibiotic exposure on the burden of asthma. 2023 Oct. Community Antimicrobial Stewardship Meeting, BC Centre for Disease Control.
- [Oral] Transportability of clinical prediction models across settings. 2023 July. Canada Korean Conference on Science and Technology. Ottawa.
- [Poster] **Lee TY** (Team Lead), Xia Y, Mien LLH, Petkau J (Mentor). Impact of crowding on return visits in the emergency department. 2023 May. Statistical Society of Canada Annual Meeting - Case Studies Competition.
- 2022 [Oral] Progress update: asthma policy model. Research Oversight Committee Meeting for the [CHILD study](#). 2022 Nov. Genome BC.
- [Oral, Poster] Closed-form solution of the bivariate unit normal loss integral with application to value of information analysis. 2022 June. 44th Annual Meeting of the Society for Medical Decision Making.

[Oral] Discussant of Dr. Anirban Basu's draft paper, "Use of race in clinical algorithms." 10th Health Economics Methodology Meeting. 2022 June. Vancouver.

[Poster] 16-year trends in asthma hospital admissions in Canada. 2022 June. CHEST Congress 2022.

[Poster] 15-year trends in chronic obstructive pulmonary disease hospital admissions in Canada. 2022 May. American Thoracic Society 2022 International Conference.

[Oral] Projecting the outcomes of early interventions for asthma: data-driven and modeling studies. 2022 April. Canadian Respiratory Conference.

2021 [Oral] 20-year trends in asthma hospital admissions in Canada. 2021 Nov. Collaboration for Outcomes Research and Evaluation, UBC.

[Oral] Integrating Julia and R (Studio) for microsimulation modeling: Challenges and rewards. 2021 July. R for HTA. Online.

- Slides:  giabaio.github.io/r-hta/lee/

[Poster] Long-term natural history of severe asthma exacerbations and their impact on the disease course. 2021 May. Graduate Student and Postdoctoral Fellow Research Symposium. UBC.

[Poster] Does the occurrence of a severe asthma exacerbation change the rate of subsequent events? 2021 May. Canadian Thoracic Society. Victoria.

PROFESSIONAL DEVELOPMENT

In-progress	Stanford Postdoc Teaching Certificate
2026	Stanford CTL + CIRTL Associate Certificate
2025	Stanford Postdoc Mentoring Certificate
2025	Stanford Cancer Institute Comprehensive Cancer Research Training Program
2024	CASCADES: Summer Institute on Sustainable Health Systems
2022-Present	Associate Statistician (A.Stat.), the Statistical Society of Canada

TEACHING EXPERIENCE

INSTRUCTOR

2026 Spring	BIOS 441: Dos and Don'ts in Clinical Prediction Models Sole designer and instructor 1.5 hours three times a week for 3 weeks Stanford University School of Medicine
2023 Fall	PHAR 423: Statistical Methods for Pharmaceutical Outcomes Research Co-designer and co-instructor 1.5 hours twice a week for 13 weeks Faculty of Pharmaceutical Sciences, UBC

TEACHING ASSISTANT

2019 Winter	STAT 443: Times Series Department of Statistics, UBC
2017 Winter	STAT 443: Times Series Department of Statistics, UBC
2016 Winter	STAT 300: Intermediate Statistics for Applications Department of Statistics, UBC

MENTORSHIP EXPERIENCE

June 2025-Present	Amirhosein Farahmand, Undergraduate student Department of Mathematics Statistics, and Computer Science, University of Tehran Project: Robust decision curve analysis for survival risk prediction models in the presence of informative censoring. First position: MSc student, University of Calgary.
June 2025-Present	Junu Min, High school student The American School, Japan Project: Reproducibility of the Social Deprivation Index First position: Undergraduate student, Harvard University.
July 2025-Feb 2026	Lydia Schwartz, Undergraduate student Biomedical Computation and Public Policy, Stanford University Project: Implementing the Community Deprivation Index
June-Sep 2025	Michelle Choo, High school student Phillips Exeter Academy, USA Project: Reproducibility of the Social Vulnerability Index
Apr-June 2025	Ishika Kaushik, Undergraduate student Biomedical Sciences, University of California - Davis Project: Social drivers of health indices First position: Software Quality Control, Senseonics
Jan-Aug 2021	Nevrose Mangat, Undergraduate pharmacy student Faculty of Pharmaceutical Sciences, UBC Project: Scoping review of trends in asthma hospital admissions First position: Pharmacist
May-Aug 2017	Jenny Lee, Undergraduate student Department of Statistics, UBC Project: Curation and analysis of the AirCare data First position: Data Engineer, Microsoft

GROUP MENTORSHIP

2025 Fall	Stanford Science Small Group Mentor 3 community college students Stanford University
-----------	--

2020-2022 Bachelor of Pharmaceutical Sciences Mentor
7 first-year undergraduate students
Faculty of Pharmaceutical Sciences, UBC

PROFESSIONAL SERVICE AND EXPERIENCE

STATISTICAL EDITOR

2024-2025 Thorax (x23)

REFeree

European Respiratory Journal (x4)

Thorax (x3)

Health Economics (x2)

BMJ Digital Health & AI (x1)

Medical Decision Making (x1)

Medical Decision Making Policy & Practice (x1)

Journal of Clinical Oncology (x1)

GRANT REVIEWER

2025-2026 Canada Graduate Research Scholarship - Doctoral Program

2026-2027 Canada Graduate Research Scholarship - Doctoral Program

CONFERENCE SESSION ORGANIZER

2026 Joint Statistical Meetings. Invited paper session: Novel metrics for evaluating group fairness in clinical prediction models and implications in health policy.

2025 Joint Statistical Meetings. Topic-contributed session: Preferential sampling in environmental exposures and its impact on inference with implications in environment and health policy.

CONFERENCE ABSTRACT REVIEWER

Society for Medical Decision Making (x3)

JuliaCon (x1)

CONSULTANT

Risk calculator for severe asthma exacerbations among patients with severe asthma

Dr. Wenjia Chen, National University of Singapore.

Disease outbreak detection algorithms

BC Centre for Disease Control

R tutorials for a graduate-level course on causal inference

Dr. Boris Sobolev, School of Population and Public Health, UBC

Evaluation of a pharmacy-technician training program

Dr. Jason Min, Faculty of Pharmaceutical Sciences, UBC
